### **DETAILED ACTION**

#### Election/Restrictions

Applicant's election without traverse of Group VIII (claims 38-47), methyl-TH-DL-Trp and cisplatin in the reply filed on December 10, 2007 is acknowledged.

Claims 1-37, 40 and 48-52 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected inventions/species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on December 10, 2008.

The search of the prior art has been extended to include the IDO inhibitor, 1-methyl-DL-tryptophan (1MT).

# Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 38, 39 and 41-47 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the treatment of breast cancer, does not reasonably provide enablement for the treatment other cancers. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to practice the invention commensurate in scope with these claims.

Claims 38, 39 and 41-47 are drawn to a method of treating cancer comprising administering an IDO inhibitor and a chemotherapeutic compound. Methyl-TH-DL-Trp, 1-methyl-DL-tryptophan (1MT) and cisplatin are the elected species of IDO inhibitors

Art Unit: 1614

and chemotherapeutic compound currently under examination. The prior art indicates that cancer is a group of maladies not treatable with one medicament or therapeutic regime. No single chemotherapeutic drug is useful for the treatment of every case of cancer. In fact, some types of cancer do not respond well to any known chemotherapeutic drugs (see Oxford Textbook of Oncology, p. 451, Column 2, last paragraph). These negative results indicate the unpredictability of the art. Furthermore, the applicant has provided no working examples demonstrating the efficacy of this treatment on cancers other that breast cancer. For these reasons, it would take undue experimentation by one of ordinary skill in the art to use this method to treat cancers, other that breast cancer, with a reasonable expectation of success.

# Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

Art Unit: 1614

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 38, 39 and 41-47 are rejected under 35 U.S.C. 103(a) as being unpatentable over Munn et al (US PGPUB 2001/0001040) in view of Shaw (US Patent No. 5922689).

Claims 38, 39 and 41-47 are drawn to a method of treating cancer comprising administering an IDO inhibitor and a chemotherapeutic agent. Methyl-TH-DL-Trp, 1methyl-DL-tryptophan (1MT) and cisplatin are the elected species of IDO inhibitors and chemotherapeutic compound currently under examination. Munn et al teaches that IDO inhibitors, including 1MT, are useful in the treatment of cancer (paragraph [0017]). Munn et al does not teach the administration of cisplatin with 1MT. Shaw teaches that cisplatin is chemotherapeutic agent, effective in inhibiting the growth of human breast cancer (column 5, Example 6). Therefore, it would have been obvious to one of ordinary skill in the art at the time of the instant invention to administer 1MT and cisplatin to treat breast cancer, since both compounds were known to be useful chemotherapeutic agents. Thus resulting in the practice of the instantly claimed invention with a reasonable expectation of success. Applicant is reminded of in re Kerkhoven, which affirmed "It is prima facie obvious to combine two compositions each of which is taught by the prior art to be useful for the same purpose, in order to form a third composition to be used for the very same purpose.... [T]he idea of combining them flows logically from their having been individually taught in the prior art." In re Kerkhoven, 626 F.2d 846, 850, 205 USPQ 1069, 1072 (CCPA 1980)

Application/Control Number: 10/551,151 Page 5

Art Unit: 1614

Additionally it would have been obvious to one of ordinary skill in the art at the time of the instantly claimed invention to administer the IDO inhibitor and the chemotherapeutic agent concurrently or sequentially, in any order, since these methods of administration are common in combination therapy.

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to CHRISTOPHER R. STONE whose telephone number is (571)270-3494. The examiner can normally be reached on Monday-Thursday, 7:30am-4:00pm EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ardin H. Marschel can be reached on (571) 272-0718. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
